

QUNET TOKEN

TOKENOMICS

1. Overview

QUNET Token is designed as a controlled authorization settlement asset. The tokenomics model prioritizes governance integrity, capital discipline, and long-term infrastructure sustainability over speculative expansion.

2. Supply Structure

Metric	Value
Total Supply	1,000,000,000 QUNET
Initial Liquidity	3,000,000 QUNET
Liquidity Pair	QUNET / ETH
Initial ETH Contribution	5 ETH
Liquidity Lock Duration	24 Months

3. Allocation Model

Category	Percentage	Tokens
Founder	17%	170,000,000
Strategic Investor	10%	100,000,000
Liquidity Provision	15%	150,000,000
Ecosystem & Growth	30%	300,000,000
Treasury Reserve	20%	200,000,000
Future Incentives	8%	80,000,000
Total	100%	1,000,000,000

4. Vesting Structure

Founder Allocation: 12-month cliff (30% unlock), followed by linear vesting until 36 months total duration.

Strategic Investor Allocation: Structured vesting contract deployment.

Liquidity Allocation: 24-month lock period.

Treasury & Ecosystem Funds: Managed via multi-signature governance.

5. Governance & Control

Treasury funds are controlled via multi-signature wallet architecture. Vesting contracts ensure transparent, time-based token release. Liquidity deployment follows controlled expansion principles.
